PRODUCT BULLETIN

'14 NISSAN PATHFINDER

2014 WHEEL RANGE

PATHFINDER

FEATURE WHEEL:
GRANITE SMALL CAP
18x8

Nissan has released the new 2014 Pathfinder with a different PCD/
Bolt Pattern.

The 2014 vehicle now has a 5/114.3 PCD, departing from the previous
6/114.3. The centre bore measures at 66.1mm (CBL 405-BL73661),
and takes a 12x1.25 21mm nut.

As our 5 stud small cap 4x4 wheels come with a multi-drill, please
supply with Tuner Nuts (402-223). Refer to the following page for a
more detailed listing.

We are pleased to advise that we can offer our highly popular Raptor
and Jackal 4x4 styles to suit this vehicle, along with the newly
released Granite wheel in 18" sizes and above (as factory supply
is 18" and above across their range). There are also a myriad of
Passenger/SUV wheels available that will suit.

The Rear Axle rating is 1496kg, so wheels rated above 750kg are
approved for fitment.
