Given the huge success of the CSA Monster in 16" sizes, we've recently expanded the range to include the 17x8 rim size in an array of fitments.

The new 17x8 features an impressive amount of lip around the rim edge, along with a high gloss black base underneath the machined elements characterised originally by its smaller sibling.

We have changed the cap as shown above, which is now a screw in rather than the previously used clip in.

The wheels are here and our team are ready and waiting, so get in touch today!

Bulletin No: **134** Product Group: **Alloy Wheels**

The wheel is finished with a high gloss black with machine face, and has incredible detail around the rim edge and spoke face that creates a tonne of visual interest on top of the attractive deep lip.

An eye catching wheel that we expect to be hugely popular, it is available in a multitude of PCD drillings; and as usual we've done our best to ensure that we can offer a fitment to suit your vehicle.

Refer below for full fitment and specification listing.

Monster 17X8 Wheel Range Fitments
